THE RULES (keep it simple)

1. Pay EMI Rs 1,60,000 FIRST every month.
2. Stay under ~Rs 1,063/day on groceries + eating out + fuel. That is the whole game.
3. Auto-debit the SIP / SSY / policy so the 96K is saved before you can spend it.
4. Keep Rs 41,499/month flowing into investments — that is your wealth + your future buffer.
5. Any month you beat the daily limit, sweep the saving into the SIP.

Per-day = monthly amount / 30. Built from your 2026 expense sheet. EMI includes the Rs 20,000 extra prepayment.
